Education

Worcester Polytechnic Institute (WPI) – Worcester, MA | GPA: 3.9

B.S. in Computer Science & Interactive Media & Game Development

May 2026

Skills

Programming: C++, C#, C, Python, Java, Ruby, JavaScript, HTML/CSS, x86 Assembly

Software: Adobe Suite (Photoshop, Illustrator, Acrobat, Fonts, After Effects, Colors), Github, Git, Sourcetree, Canva, Microsoft 365, R, MatLab, Trello, Jira, Miro, Unity, Unreal, Custom Engine Development, SVN Source Control, React, d3, Astro, Svelte, Flask, Bootstrap, Figma, OpenGL, WebGL, ActionBound, Google Docs, Google Slideshow, Google Sheets, ZBrush, Vercel, Vite, Virtualbox, PyTorch, Pandas, MongoDB

Core Strengths: Creative Problem-Solving, Team Collaboration, Storytelling, Human-Centered Design, Accessibility

Experience

Application Developer Intern - Carlson Software (Hybrid)

May 2026—August 2026

- Worked on mixed profile support & surface TIN delineation for the 2026 & 2027 builds of Carlson (tech solution for land surveying, GIS, mining, and civil engineering) using C++
- Participated in agile sprints where I patched bugs in varied modules in existing Carlson builds daily
- Utilized Jira to keep track of active tickets and tasks

Lead Game Programmer - Guilty Fox (Remote -> Under NDA)

March-June 2026

- Led gameplay programming for an unannounced Unity tactical RPG under NDA, architecting the core combat, exploration, & gameplay systems
- Designed & iterated on a tile-based tactical combat framework, improving extensibility & debugging workflows
- Collaborated with artists, animators, designers, composers, and programmers while mentoring junior developers

Research Intern – Harvard University & RedfishGroup (Hybrid)

May 2025—May 2026

- Built a geospatial media tool integrating Google Maps & Street View
- Leveraged metadata for decentralized media sharing
- Applied computer vision, web development, and data modeling techniques

Lead Game Programmer – Wonderworks (Remote)

June 2024—September 2025

- Lead programmer for a 2D JRPG in Unity/C#
- Designed combat systems and UI; refined gameplay mechanics
- Supported project management & mentored team members

Projects

Geocamera (Independent project)

May 2025—Present

- Uses Google Maps API & YouTube I-Frame API & Tabulator
- Geospatial multimedia calibration tool reconstructing structure-to-structure ignitions from wildfires

RPG Template (Independent project)

December 2023

- Custom menus created for each necessary aspect of the game
- Dragon Quest inspired system with combat, quest, dialogue, scene transition, camera, game manager, inventory, saving, audio, and shop systems (among others)

ASKMII Engine (Independent project at WPI)

Oct 2024

- Created a custom ASCII game engine in C++/SFML & games to be played by the engine
- Documentation: dragonfly.wpi.edu/include/index.html, with custom additions as exceptions
